Date of birth 21st December 1977

Professional Summary

Experienced Project Manager and Product Owner with a multidisciplinary background spanning Product Management, Full-Stack Software Development, and Civil Engineering. Proven track record of delivering 10+ complex IT projects from discovery to production across domains including insurance, AI, e-commerce, IoT, Blockchain, construction, and sports. Strong ability to lead teams, manage roadmaps and backlogs, aligned with stakeholders' needs. Comfortable working in Agile (Scrum, Kanban), hybrid, and Waterfall environments, with active use of AI tools to support analysis, documentation, code coding and design.

Work Experience

September 2019 - Present

💻 Void Software S.A. ↗

Project Manager/ Product Owner

Lead cross-functional software development teams (3-10 members). Manage product roadmaps, backlogs, and stakeholder communication for diverse projects. Participate in scrum events. Collaborate with technical teams to define architecture, prioritize features, and ensure timely delivery.

Tech Stack: Web Apps; SaaS; Mobile Apps (iOS and Android); Machine Learning; AI; Computer vision; Blockchain (Hyperledger Fabric); IoT.

Methodologies: Agile (Scrum and Kanban) as well as waterfall methodologies.

Third-party integrations: Financial services (Stripe, PayPal), AWS services, Authentication services (OAuth, Keycloak), Location services(Google Maps, Mapbox) and Marketplaces (Shopify).

Projects: Successfully delivered 10+ projects from conception to production including:

- Bhout - R&D project for a full featured next generation boxing bag ↗
- Fluxe - AI-powered insurance platform, integrating machine learning models for car damage detection. ↗
- Leiria Market - Marketplace for e-commerce ↗
- Argo - Traveling social app ↗
- Boxcore - Safety and data management to improve workers productivity ↗
- FIAF (International Federation of Film Archives), Members Data Base - Treasures Database Archive ↗

Fullstack Developer

Developed full-stack applications and RESTful APIs, implementing business logic, data models, and database schemas. Wrote comprehensive unit and integration tests to ensure code quality and performance.

Collaborated effectively with cross-functional teams including frontend developers, QA engineers, and other scrum team members in agile environments.

Technologies: Java; JavaScript/TypeScript; WebSockets; SQL; HTML; React; CSS; Docker, etc.

May 2016 - August 2018

💻 Freelancer

Civil Engineer

Supervision of Civil works, Design modifications, QA/QC supervision, Commissioning.

Projects: Piping improvements for a wastewater treatment plant in Leiria, Portugal; Refurbishment of a 36 apartments condominium in Quiaios, Portugal.

<p>July 2008 - April 2016</p>	<p> Wärtsilä Corporation ↗, outsourcing from Citec Group ↗</p> <p>Construction Manager Civil Supervisor Site Engineer</p> <p>Progressed through multiple roles managing international construction projects across 7 countries. Responsibilities included supervision of site works, management of human resources and subcontractors, scheduling, logistics management, process engineering, design modifications, QA/QC supervision, and ensuring compliance with HSE regulations.
